RESEARCH INTERESTES

Internet of Things (IoT), Mesh Networks, Secure Wireless Communications, Multi-Radio Systems, Industrial Wireless Control, Software Defined Networking (SDN), Drones, Autonomous Robotics, RF Backscatter

EDUCATION

PhD, University of Bristol (2020)

Thesis: *Software-Defined Networking for the Industrial Internet of Things* ([online](#))

MEng, University of Strathclyde (2010)

Degree Result: *MEng with Merit in Computer and Electronic Systems*

KEY SKILLS

C/C++:	Real-Time Operating Systems (RTOS) (Contiki-NG, FreeRTOS, Zephyr, NuttX)
Python:	pandas, matplotlib, numpy, seaborn
Java EE:	Maven, Karaf, Camel, ActiveMQ, CXF
Other:	Linux Bash, Makefiles, Git, Matlab, Docker, Jira, Software Defined Radios (GNU Radio)
Wireless Standards:	BLE, IEEE 802.15.4, LoRa, WiFi
Network Protocols:	6TiSCH, 6LoWPAN, RPL, CoAP, MQTT, TCP/UDP, OpenFlow, BATMAN-adv
Embedded SoC:	Nordic (nRF52840, nRF5340), TI (CC2420)

EXPERIENCE

Lead Wireless Researcher, *Secure Systems Research Centre, Technology Innovation Institute (Abu Dhabi, UAE)* 2020 - present
Applied research in secure and resilient wireless to support autonomous drone and robust phone communications.
Relevant Skills: *Secure Comms, Drones, Mesh, Multi-Radio, Uni. Collaboration, Patents, Papers*

Senior Research Engineer, *Toshiba Research Europe Ltd. (Bristol, UK)* 2018 - 2020
Wireless mesh research. Protected IP through patents. Published academic papers. Wrote successful funding proposals.
Relevant Skills: *Embedded C, RTOS, Python, IoT, Wireless, Patents, Papers, Funding*

Software Developer, *Thales Transportation Systems (Stuttgart, DE)* 2013 - 2014
Software architect for the development of a Java Enterprise Service Bus (ESB) middleware for railway protocol integration.
Relevant Skills: *Java EE, Software Architecture, Scrum/Agile*

Design Engineer, *Thales Research and Technology (Reading, UK)* 2011 - 2013
Designed VHF-band radio drivers for aircraft communications and developed projects to explore new research areas.
Relevant Skills: *Embedded C, Wireless Communications*

Business Process Developer, *SwordCiboodle (Glasgow, UK / Chicago, IL)* 2010 - 2011
Developed Customer Relationship Management (CRM) systems in Java and JavaScript, supervised releases of new software.
Relevant Skills: *Java, JavaScript, Scrum/Agile*

OPEN SOURCE PROJECTS:

- [OSF: Open Synchronous Flooding](#)
- [µSDN: A low-overhead SDN stack and lightweight controller for embedded devices](#)

PUBLICATIONS AND PATENTS

- X20 publications in IEEE/ACM journals, conferences, and workshops.
- X1 US patents accepted, X4 US patents pending.
